BLUE GIANT INNOVATIVE SOLUTIONS FOR LOADING BAYS & DOCKS

As an Australian Authorised Dealer and Premium Distributor for **Blue Giant Docking Equipment**, A B Equipment has an excellent range of purpose-designed Dock Levellers and Scissor Lifts, and a wide range of auxiliary equipment. From concept through to installation, A B Equipment can assist your business as we have with numerous companies Australia-wide both past and present. Companies like: Coles, Target, K-Mart, PFD, Aldi, plus many more rely on A B Equipment for both advise, service and supply of quality loading bay equipment.

BLUE GIANT IS LEADING THE WAY IN LOADING BAY & DOCK SOLUTIONS!

Why Specify Blue Giant?

- Up to 10 years Warranty.
- Leaders in Dock Technology.
- Reliable & Dependable.
- 12 months servicing included.

Dock Levellers

Blue Giant dock levellers have been setting the industry standard for safety, durability and ease of operation since 1963.

Designed for demanding applications, each dock leveller offers exceptional performance, reliability, and safety levels as well as a low lifetime cost of ownership.

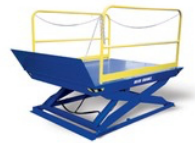

Truck Restraints

Blue Giant vehicle restraints service a wide range of carriers, including those with bent or damaged ICC bars, and may be interlocked with dock levellers for enhanced performance. Hydraulic, electric and mechanical models are available to accommodate site and sustainability requirements. All vehicle restraints come standard with Blue Genius™ touch controls and an interior and exterior LED lights communication system.

Scissor Life/Hoist

Blue Giant lift products can be built in virtually any size and capacity required for the application. They provide the ability to service trucks at any height and can also offer access to ground level for fork trucks. Pit mounted dock lifts are capable of height adjustments between 0cm and 149.86cm. Greater efficiency can be achieved by utilising a dock lift wide enough to allow side-by-side pallet loading.

Communication Systems

Blue Genius™ Touch Control Panels are offered in a variety of configurations.

- Standalone dock levellers and vehicle restraints.
- Loading dock and vehicle restraint combinations.
- Overhead door and loading dock and/or vehicle restraint combinations.

The customisable component integration of the Blue Genius™ sets the standards for future dock control technology.

Advantages of dealing with a specialist Australia-wide

It's all about your business and your customers, especially when you are in a competitive environment such as organising tenders and projects. This is where A B Equipment can help you with Loading Bay/Dock requirements, including free advise, site inspection, technical drawings as well as prompt service and guarantees on all products and work supplied.

What if it needs to be customised?

This is not a problem, as A B Equipment also manufacture specialty Dock products upon request, even in Heritage listed buildings.
